NIGHTLOCK® LOCKDOWN SAFETY SHADES

FAQ

DO YOU PROVIDE A SAMPLE?

We recommend customers order one shade that is fitted properly to be installed and utilized on a window in their facility.

HOW DO NIGHTLOCK LOCKDOWN SAFETY SHADES INCREASE SCHOOL SAFETY?

Lockdown Safety Shades are made of high-quality, blackout, fire retardant fabric and are easy to install using industrial strength adhesive. They are designed to keep individuals out of sight during an emergency and are an essential tool in school security.

The shades deploy instantly without having to think or kneel or bend over. During a lockdown drill or emergency, a person only has time to react. A simple pull of the Velcro strap will release the window covering and allow it to fall into place within seconds. This important school safety product is a vital component in school security.

DOES A LOCKDOWN SHADE NEED TO HAVE A WAY TO SECURE AT THE BOTTOM?

Since Lockdown Safety Shades are made with extremely high-quality, heavy fabric and a weighted hem bar, there is enough weight to help it fall into place quickly and effectively. Adding a way to secure the shade at the bottom only increases the time a person spends securing a room. In the event of an emergency there is only time to react, not think through a long list of things "to do", including making sure a shade is secure at the bottom.

HOW DO I GET THE CORRECT SIZE SHADE?

It is critical to order the proper size shade for the window to be covered during a lockdown emergency. We recommend purchasing a shade that is 3" wider than the glass window pane, and 6" longer than the

glass window pane. Please be sure to make note of any obstructions at the top, bottom, or sides of the window that may interfere with the operation of the window shade.

WHAT FABRIC IS USED TO MAKE NIGHTLOCK LOCKDOWN SAFETY SHADES?

Our high-quality, blackout classroom window coverings are 100% polyester.

HOW EASY IS IT TO INSTALL NIGHTLOCK LOCKDOWN SAFETY SHADES?

- Step 1: Prior to installing, check that the shade is the proper fit for the window it will be covering.
- Step 2: Wipe the area where the shade will be applied with rubbing alcohol. Let dry.
- Step 3: Pull off liner to expose the industrial strength adhesive.
- Step 4: Using two hands, align the shade above the window. Push firmly to secure.
- Step 5: Carefully remove shade temporarily, press adhesive strip for 30 seconds.
- Step 6: After waiting at least 2 hours for adhesive to bond, secure shade back on the strip.

WHEN WILL MY ORDER SHIP ONCE IT IS PLACED?

Standard Sizes can ship within 1-3 business days. Custom shade orders can ship within 1-3 weeks.

PLEASE REVIEW OUR RETURN POLICY

ONLY STANDARD SIZES with intact adhesive backing can be accepted for return. CUSTOM SIZES ARE NOT RETURNABLE. Customers have 30 days from receipt of the product to return STANDARD SIZES for replacement or refund. Shipping costs will NOT be refunded. Cost of shipping to return products are customers responsibility. Damaged products must be reported within 30 days.
