

Nightlock Lockdown Safety Shade Installation Instructions

Nightlock Lockdown Safety Shades are made of high quality, blackout, fire retardant fabric and are easy to install using industrial strength adhesive.

Here are some tips to make your installation go smoothly.

1. Make a list of each room and the shade sizes that you are installing. This is to help ensure that the right size Velcro and shade is installed on the correct door or window.
2. Make sure the surface that you are adhering the shades to is clean, to ensure a strong adhesive connection.
3. Apply the Hook side Velcro strip to the door or window surface, making sure to apply it centered over the opening, level and straight. **Press firmly to eliminate any air bubbles. We recommend that you use a Roller Tool to ensure best adhesion.**
4. **Wait 24 - 30 hours before attaching the shade. Velcro recommends this for best adhesion.**
5. Holding the unrolled shade at the top, attach the shade velcro loop to the already mounted Velcro hook. Use one hand to guide the shade on level and straight, and the other hand to hold the shade out away from the Velcro hook to prevent it from sticking prematurely in an undesired position.
6. Once the shade is attached above the window, make sure that your opening is completely covered. **Use the Roller Tool again to attach the shade to the Velcro Hook for best connection.**
7. Roll up the shade to the top and press at the Velcro contacts to secure the shade.
8. To Deploy the shade, Pull the strap quickly.

Measuring for Lockdown Safety Shades.

When measuring for classroom door window shades, measure the glass opening. Then add at least 3" to the width and 6" to the length. This will give you enough coverage on the sides and length.

Standard Finished Sizes:

8" X 36", 8" X 42", 10" X 36", 10" X 42",
12" X 36", 12" X 42", 15" X 20", 16" X 36", 16" X 42",
26" X 36", 26" X 42", 28" X 36", 28" X 42"

Custom Sizes Are Available for windows.
